

Tubes Energoflex® Super SK 2m

Description

Tubes Energoflex® Super SK are a version of tubes Energoflex® Super and differ existence of a longitudinal section on which both parties the glutinous layer previously is put. It allows to simplify and accelerate considerably installation of insulating designs, and also to lower a consumption of glue. Application of being self-glued tubes gives the chance even to nonprofessionals to execute accurate and high-quality installation.

- At application in buildings there is no need for use of vapour barrier and protective layers.
- Group of flammability G1.

- Previously the put glutinous layer allows to reduce considerably time of installation and a consumption of glue.
