

## Tubes Energoflex® Super 1,2 m

### Description

Tubes Energoflex® Super 1,2 meters long are created especially for sale in retail shops. Are issued with an internal diameter from 15 to 42 mm and with thickness of a wall of 9 mm. Each tube has a sticker with a bar code and a standard size.

For convenience of placement of tubes on racks in points of retails, at an end face of a box are located a label with the name and pull out valve.

The transport pallet of the standard european size of 1200 x 800 mm is manufactured of a cardboard and is subject to repeated processing after use.

Important logistic advantage of insulation of Energoflex® Super 1,2 meters long is possibility of the maximum use of volume of the standard truck thanks to loading in the trailer in two levels.

- A label with the name and pull out valve at a box end face for convenience of retails.
- The sticker with a bar code and a standard size is pasted on each tube.
- Opportunity as much as possible to use the volume of the standard truck thanks to loading in the trailer in two levels.
