

Tubes Energoflex® Super Protect

Description

Energoflex® Super Protect tubes are specially developed for the insulation of pipes of heating and water supply laid in floor and wall constructions. Insulation possesses high resistance to mechanical damages and aggressive construction materials. The polymeric coating increases the durability of pipes by 50 %, thus making the insulation a reliable protection for pipes, and the elastic layer of polyethylene foam helps to compensate thermal expansion of pipes. The advanced technology of simultaneous extrusion of a polyethylene tubes and a polymeric film provides reliable welding of thermal protection and a coating.

The release form in coils considerably reduces the cost of transportation and warehousing logistics.

The material possesses increased protection against mechanical impacts at site
