

Cheets (rolls) Energoflex® Vent

Insulation for air ducts in ventilation and air-conditioning systems

Maximum service temperature	μ-фактор	λ ₂₀
90 °C	≥ 9 000	≤0,039 W/(m·°C)

Specialized self-adhesive insulation Energoflex® Vent for heat-, sound insulation of air ducts of ventilation and air conditioning systems. Energoflex® Vent – the unique made foam material, produced from UMS-polymer thanks to what insulation has uniform close-meshed structure and low heat conductivity. Energoflex® Vent has the external surface strengthened due to application technological operations of stamping with an IR-warming up. Such surface is characterized with high coefficient of a thermolysis that allows to use insulating designs of smaller thickness and also gives to material highly esthetic exterior. Besides reliable protection against condensate and thermal losses of Energoflex® Vent is the effective noise-absorbing and vibrodamping material.

Self-adhesive insulation from the made foam material on the basis of UMS-polymer, grey colour.

Standard size	Article	Thickness, mm	Width, m	Length, m	Quantity per roll, m ²	Price including VAT, RUR/m ²
5/1,0-20	EFXR05120VENT	5	1	20	20	294,50
10/1,0-10	EFXR10110VENT	10	1	10	10	441,72
15/1,0-7	EFXR1517VENT	15	1	7	7	515,14
20/1,0-5	EFXR2015VENT	20	1	5	5	692,67
25/1,0-4	EFXR2514VENT	25	1	4	4	850,75

Packed into cartons with dimensions of 1020 x 395 x 395 mm. Package volume 0,16 m³
