\* Under the order production of casings of other standard sizes and forms, including from aluminum and stainless steel is possible.

\*\* Selection of metal covers shall begin with a choice of a standard size of bends. The type of bend is selected according to «Energopack® bends selection Table» depending on the outer diameter of the isolated pipeline and thickness of insulation layer.

\*\*\* The end cap can be used for transition to smaller diameter. For this purpose, on the center of a cap the opening of the necessary size is cut out.
