Specialized self-adhesive insulation Energoflex® Vent for heat-, sound insulation of air ducts of ventilation and air conditioning systems. Energoflex® Vent – the unique made foam material, produced from UMS-polymer thanks to what insulation has uniform close-meshed structure and low heat conductivity. Energoflex® Vent has the external surface strengthened due to application technological operations of stamping with an IR-warming up. Such surface is characterized with high coefficient of a thermolysis that allows to use insulating designs of smaller thickness and also gives to material highly esthetic exterior. Besides reliable protection against condensate and thermal losses of Energoflex® Vent is the effective noise-absorbing and vibrodamping material.

Self-adhesive insulation from the made foam material based on UMS-polymer, grey color.

Standard size	Article	Thickness, mm	Width, m	Length, m	Quantity per roll, m ²	Price without VAT, RUB/m ²
5/1,0-20	EFXR05120VENT	5	1	20	20	477,19
10/1,0-10	EFXR10110VENT	10	1	10	10	697,09
